INTRODUCTION

IMAP is an online application that allows underground facility owners to view, add, modify and delete polygons from their active database. The following pages will explain the process you must follow to accurately work on your database with **New Jersey One Call** using **IMAP**.

We recommend that you have IMAP up and running while you read this manual so that you can try out certain features as you learn about them. Welcome to IMAP!

Smart Phone?

Scan the barcode to the left with the **QR code reader** on your smartphone and visit New Jersey One Call on the web.

IMAP AT A GLANCE

IMAP

Here's a quick rundown of how IMAP is used to help get facility operators notified quickly and accurately.

After the new DATABASE POLYGON has been added to the database maps, PRISM works with this new information so that when a NOTIFICATION POLYGON is drawn in the area near the newly added facility, the user is directly informed.

PRISM's map interface, showing a NOTIFICATION POLYGON being drawn.

Here, you can see the NOTIFICATION POLYGON covers a portion of the new DATABASE POLYGON that was added by the user. Now that the user has successfully added the DATABASE POLYGON to the map, PRISM will automatically notify the user.

After logging into the IMAP system, the user adds a DATABASE POLYGON into the base map showing the approximate location of a particular facility. This process allows them to be notified when work is being done near this area, through OCC's PRISM technology.

New DATABASE POLYGON being added by the user.

Existing DATABASE POLYGONS already 'in' our database system.

The user wants to create a new DATABASE POLYGON within the base map for future notifications for a specific area. They log into IMAP.

LOGGING INTO IMAP

1. Go to www.nj1-call.org
2. Click the IMAP Login button.

File your locate requests online 24/7 using ITIC.

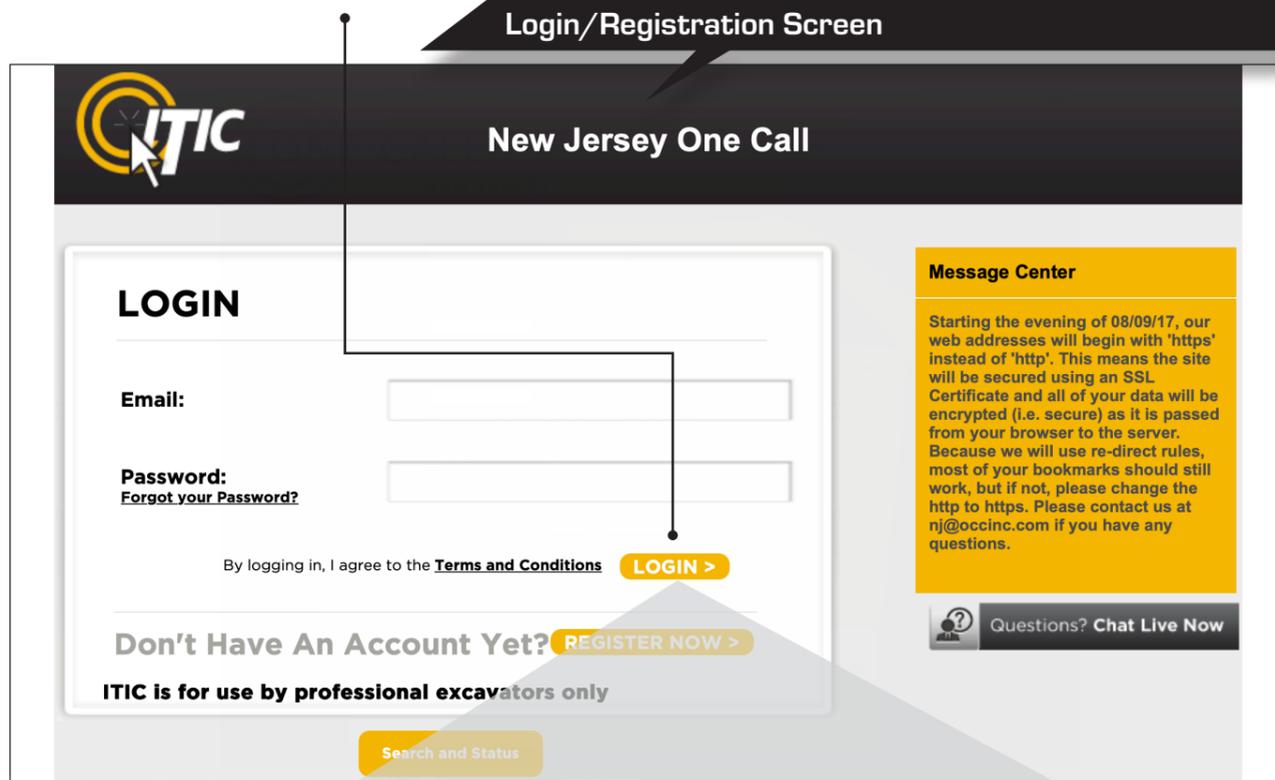

ITIC LOGIN

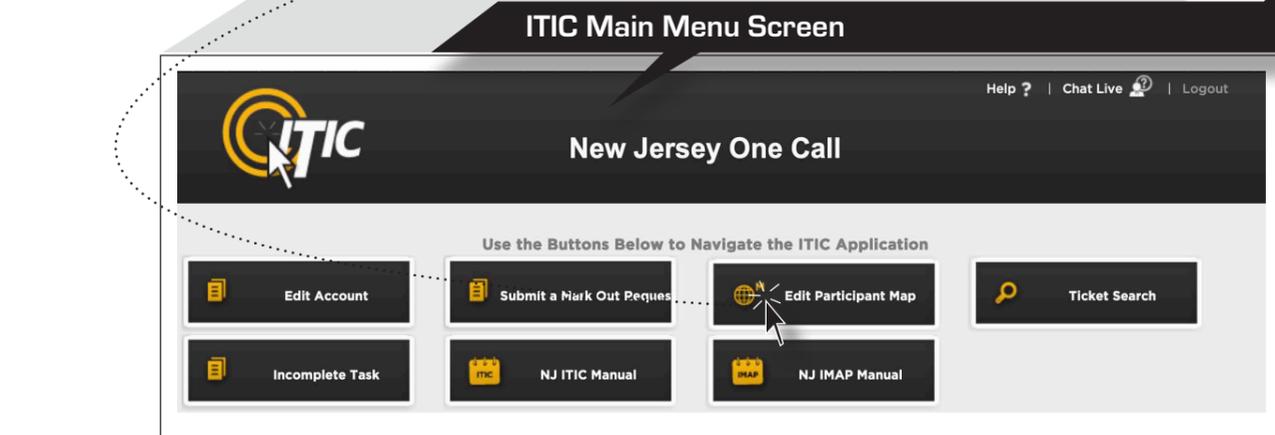

Access, edit, and manage your database info 24/7 using IMAP.

IMAP LOGIN

3. At the **New Jersey One Call Login/Registration Screen**, enter your email address and password. After agreeing to the Term and Conditions, click **Login**.

Then click "Edit Participant Map" to access IMAP.

REMEMBER: IF YOU CLICK THE BACK AND NEXT BUTTONS AT THE TOP OF YOUR BROWSER (i.e. FIREFOX, INTERNET EXPLORER, SAFARI etc.), ALL THE INFORMATION ALREADY ENTERED WILL BE DELETED!

UNDERSTANDING THE COMPONENTS OF IMAP

(After Clicking "Edit Participant Map" on the Main Menu)
The **Location Information** box will appear. The Location Information box is used to select the state, county, and district code you would like to work with.

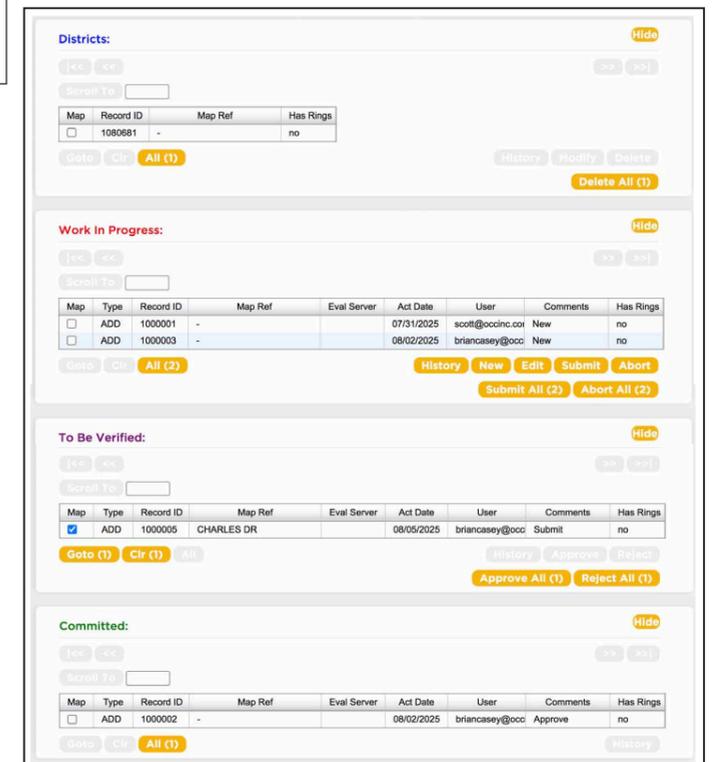

Once you have made your selections within the Location Information box, click **GO!**

The rest of the IMAP components will appear. You will see four similar boxes, labeled **Districts**, **Work In Progress**, **To Be Verified**, and **Committed**.

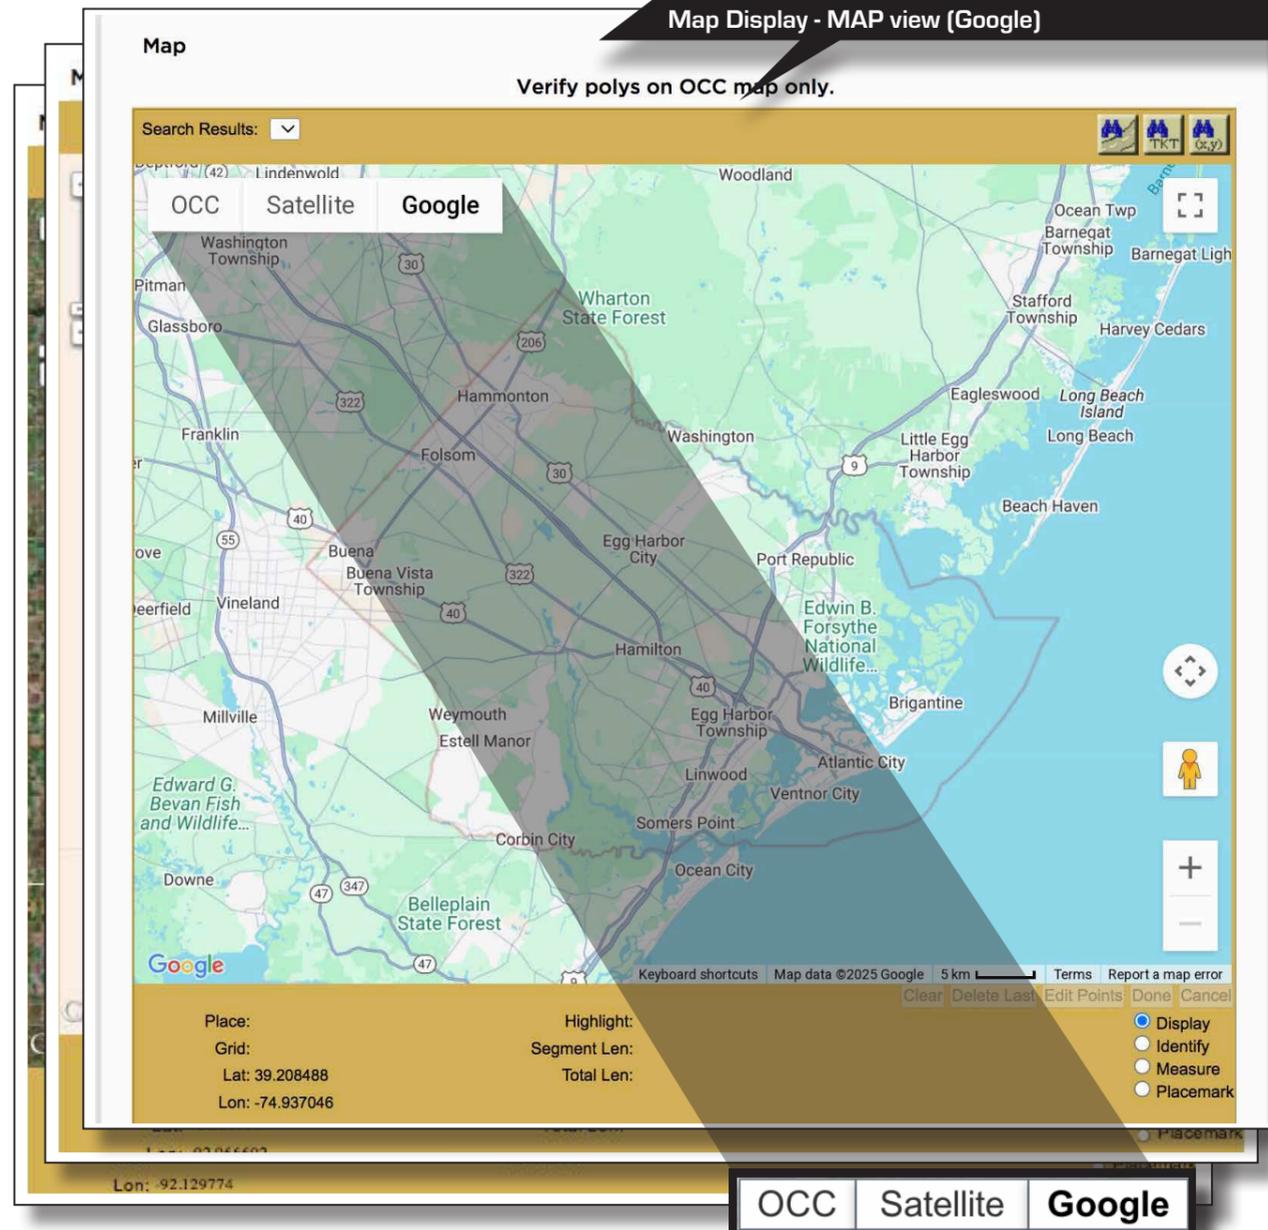

The **Districts**, **Work In Progress**, **To Be Verified**, and **Committed** boxes are used to create "transactions," which are specific instructions for deleting, editing, or creating new district polygons. They also display information on currently active polygons, or pending transactions.

Below these four boxes, you will see the **Map Display**. (Next Page)

UNDERSTANDING THE COMPONENTS OF IMAP (Continued)

The **Map Display** is the geographic context in which you create **new**, and edit or delete **existing** notification polygon(s). It can also be used to view your currently active district polygons on the map.

PLEASE NOTE:

When initially loading the Map Display, you will be presented with a Google-based map. Another viewing option, labeled "OCC," is our internal map, which you will need to select before you may confirm any transactions. The third option, Satellite, is a combination of the Google map and satellite imagery.

Your map view can be changed by clicking the buttons in the upper-right corner of the map interface.

BUTTONS AND FEATURES

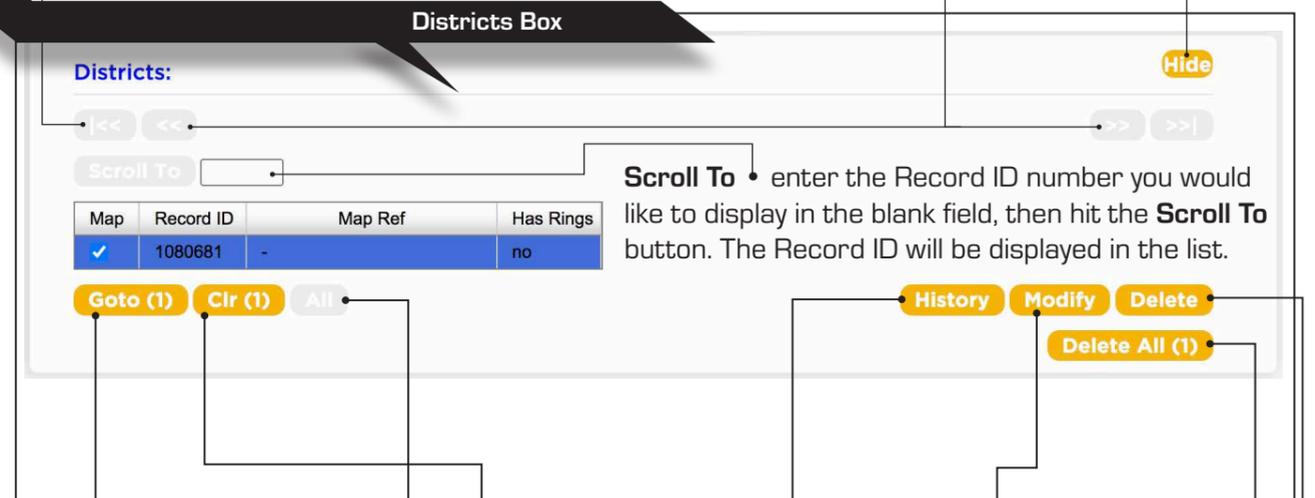

Now that we have reviewed the basic components of IMAP, let's look at the buttons and features found in the **Districts**, **Work In Progress**, **To Be Verified**, and **Committed** boxes.

DISTRICTS BOX

Scroll to Beginning/End • scrolls to the beginning or the end of the polygon list.

Scroll Fwd/Back • scrolls backward or forward one item on the polygon list.

Hide/Show • click this button to hide (or "minimize") the selected box, or show it again after it has been hidden.

GoTo • causes the map to zoom in and center on the currently selected polygon(s).

Clr • "unchecks" any currently selected polygons in the **Districts** box.

History • displays some history information on the district polygon or transaction.

Delete All • removes all polygons in the **Districts** box. This will create several transactions, all of which will appear in the **Work In Progress** box.

All • selects all polygons in the selected county and district.

Modify • edits the currently selected active polygon. This will create a transaction, which will appear under the **Work In Progress** box.

Delete • removes the selected polygon from the database. This will create a transaction, which will appear under the **Work In Progress** box.

BUTTONS AND FEATURES (Continued)

WORK IN PROGRESS BOX

GoTo • causes the map to zoom in and center on the currently selected polygon(s).

Edit • allows edits to be made to the currently selected transaction. The edits can be made using the **map interface** (see the section on **Modifying a Polygon** on page 19 for instructions on how to manipulate polygons).

Hide/Show • click this button to hide (or “minimize”) the selected box, or show it again after it has been hidden.

Work In Progress Box

Map	Type	Record ID	Map Ref	Eval Server	Act Date	User	Comments	Has Rings
<input checked="" type="checkbox"/>	ADD	1000001	-		07/31/2025	scott@occinc.co	New	no
<input type="checkbox"/>	ADD	1000003	-		08/02/2025	briancasey@occ	New	no

History • displays some history information on the district polygon or transaction.

All • selects all polygons in the selected county and district.

Clr • “unchecks” any currently selected polygons in the **Work In Progress** box.

New • creates a new district polygon. This will create a transaction, which will appear under the **Work In Progress** box.

Submit • submits the currently selected polygon transaction to the **To Be Verified** box for final review.

Submit All • submits all polygon transactions currently residing in the **Work In Progress** box to the **To Be Verified** box for final review.

Abort • terminates the selected transaction, removing it from the system entirely.

Abort All • terminates all polygon transactions currently residing in the **Work in Progress** box, removing them from the system entirely.

BUTTONS AND FEATURES (Continued)

TO BE VERIFIED BOX

Approve • approves the currently selected polygon transaction for processing. It will appear in the **Committed** box.

Hide/Show • click this button to hide (or “minimize”) the selected box, or show it again after it has been hidden.

To Be Verified Box

Map	Type	Record ID	Map Ref	Eval Server	Act Date	User	Comments	Has Rings
<input checked="" type="checkbox"/>	ADD	1000005	CHARLES DR		08/05/2025	briancasey@occ	Submit	no

GoTo • causes the map to zoom in and center on the currently selected polygon(s).

All • selects all polygons in the selected county and district.

Clr • “unchecks” any currently selected polygons in the **To Be Verified** box.

History • displays some history information on the district polygon or transaction.

Approve All • approves all polygon transactions currently residing in the To Be Verified box for processing. They will appear in the Committed box.

Reject • sends the currently selected polygon transaction back to the **Work in Progress** box for modification or deletion.

Reject All • sends all polygon transactions currently residing in the To Be Verified box back to the Work In Progress box for modification or deletion.

MAP DISPLAY (Continued)

Mouse Cursor Functions

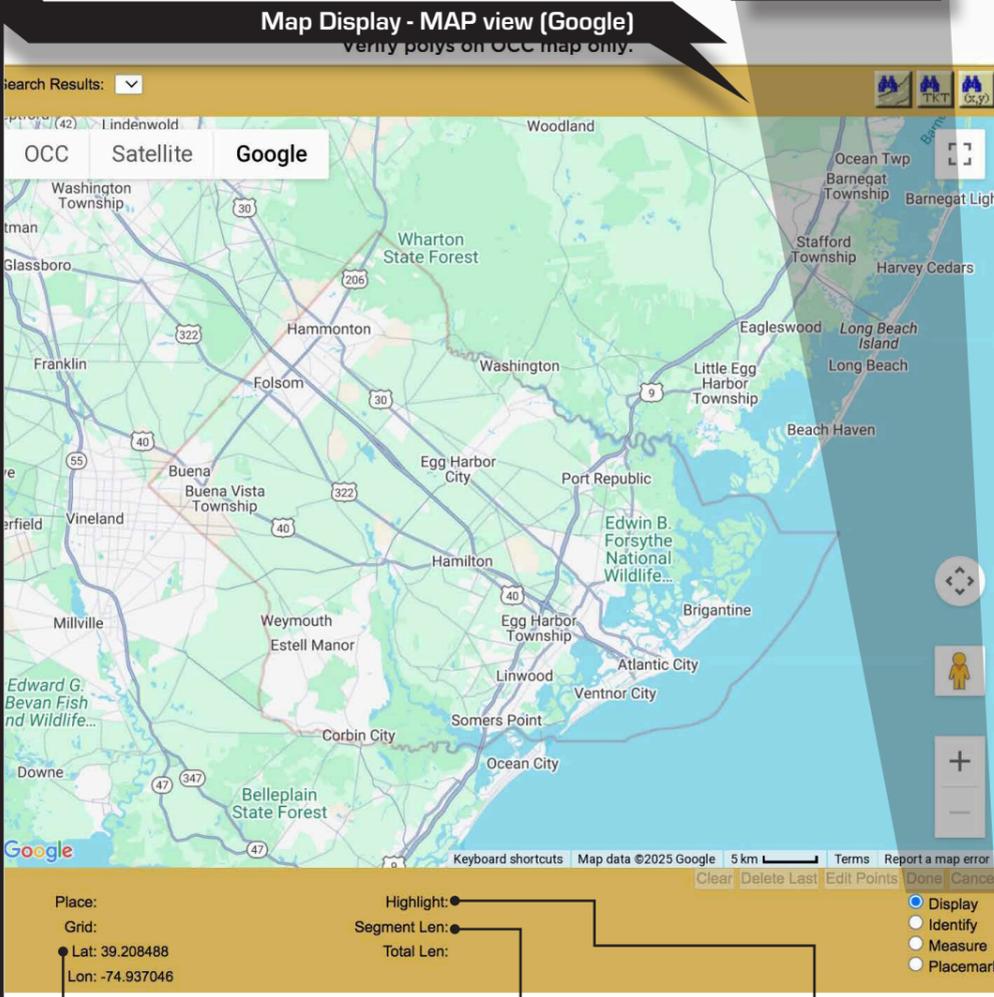

- Display
- Identify
- Measure
- Placemark

Display: The default setting for your mouse cursor. You will need to be in Display mode to use most of the functions of the map.

Identify: Select this function to identify roads, highways, rivers, creeks, etc. on the map that may not show a name. Address range information will also be displayed, if available. The info will appear in the bottom section of the map next to "Highlight." Zooming in on the map makes more names visible.

Measure: Use this function to measure the distance between points on the map. The info will appear in the bottom section of the map, under Segment Length and Total Length. In measure mode, right-clicking will add a placemark.

Placemark: The Placemark function is used to leave markers on the map for later reference. This can be very helpful when used in conjunction with the Measure tool.

Lat & Long Indicators
Displays the Latitude and Longitude where your mouse cursor is currently located.

Segment Length & Total Length
"Segment Length" displays the length of the polygon segment you're working with between the last point you have placed and the current location of your mouse cursor. "Total Length" displays the length of the entire polygon so far.

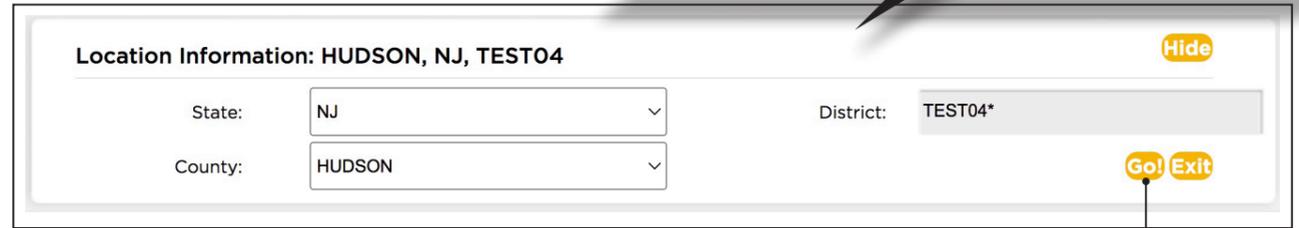

Highlight
Provides information for the currently identified map feature. (To highlight a map feature, click the Identify button located in the bottom right corner of the map display.) The Highlight field will also display the Record ID of the polygon when the mouse "hovers" over it.

Now that you know how to interact with the different components of IMAP, **LET'S GET STARTED!** The following pages outline a step-by-step walkthrough for adding new polygons to your database, as well as viewing, deleting, and modifying your currently active district polygons.

VIEWING A POLYGON

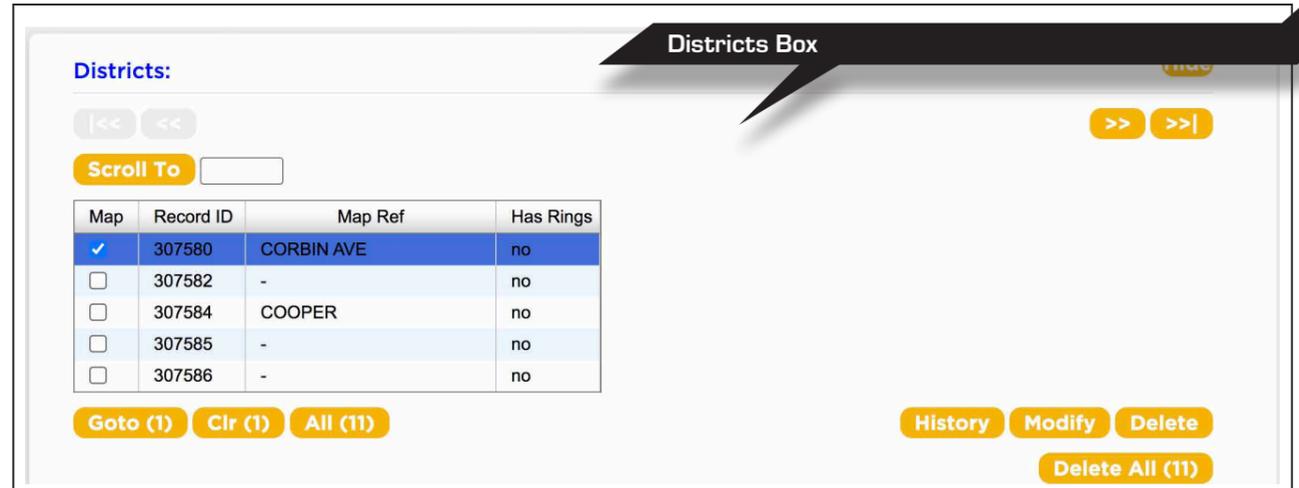

After registering and logging in, the main menu will appear. Select **EDIT PARTICIPANT MAP**. This will bring you to IMAP.

Location Information Screen

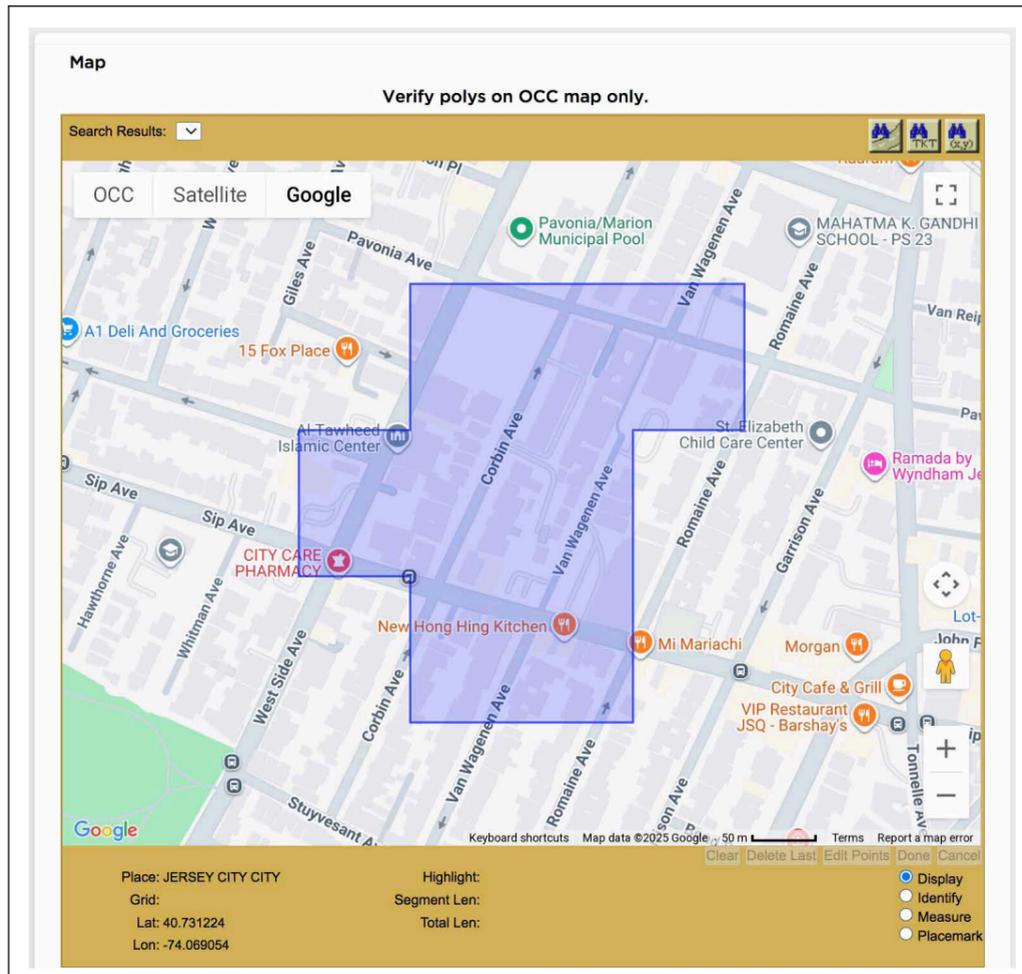

1. Select the state, county, and district code you would like to work with in the Location Information section at the top of the screen.
2. Click on **GO!** at the right side of the screen. The Districts box will display all active district polygons currently on record within the county you have selected.

Districts Box

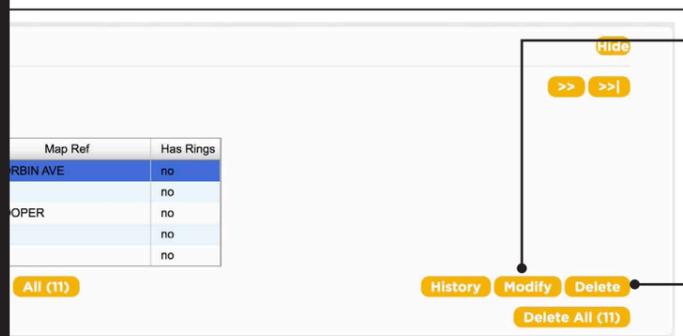

3. When in the Districts box, select the record ID of the polygon you wish to view by clicking on the checkbox underneath the "Map" column for that record ID. Notice the polygon you have selected now appears in blue on the map. To get a closer look at the polygon you have selected, click the **Goto** button located in the bottom-left corner of the Districts Box.

VIEWING A POLYGON (Continued)

Important: The changes you make to your district polygons in IMAp do not go into effect immediately. All transactions must pass through the Work In Progress and To Be Verified steps. Once they appear in the Committed box, the call center computer installs them in the database within the next few days. We will send you an email notifying you that the changes have become active.

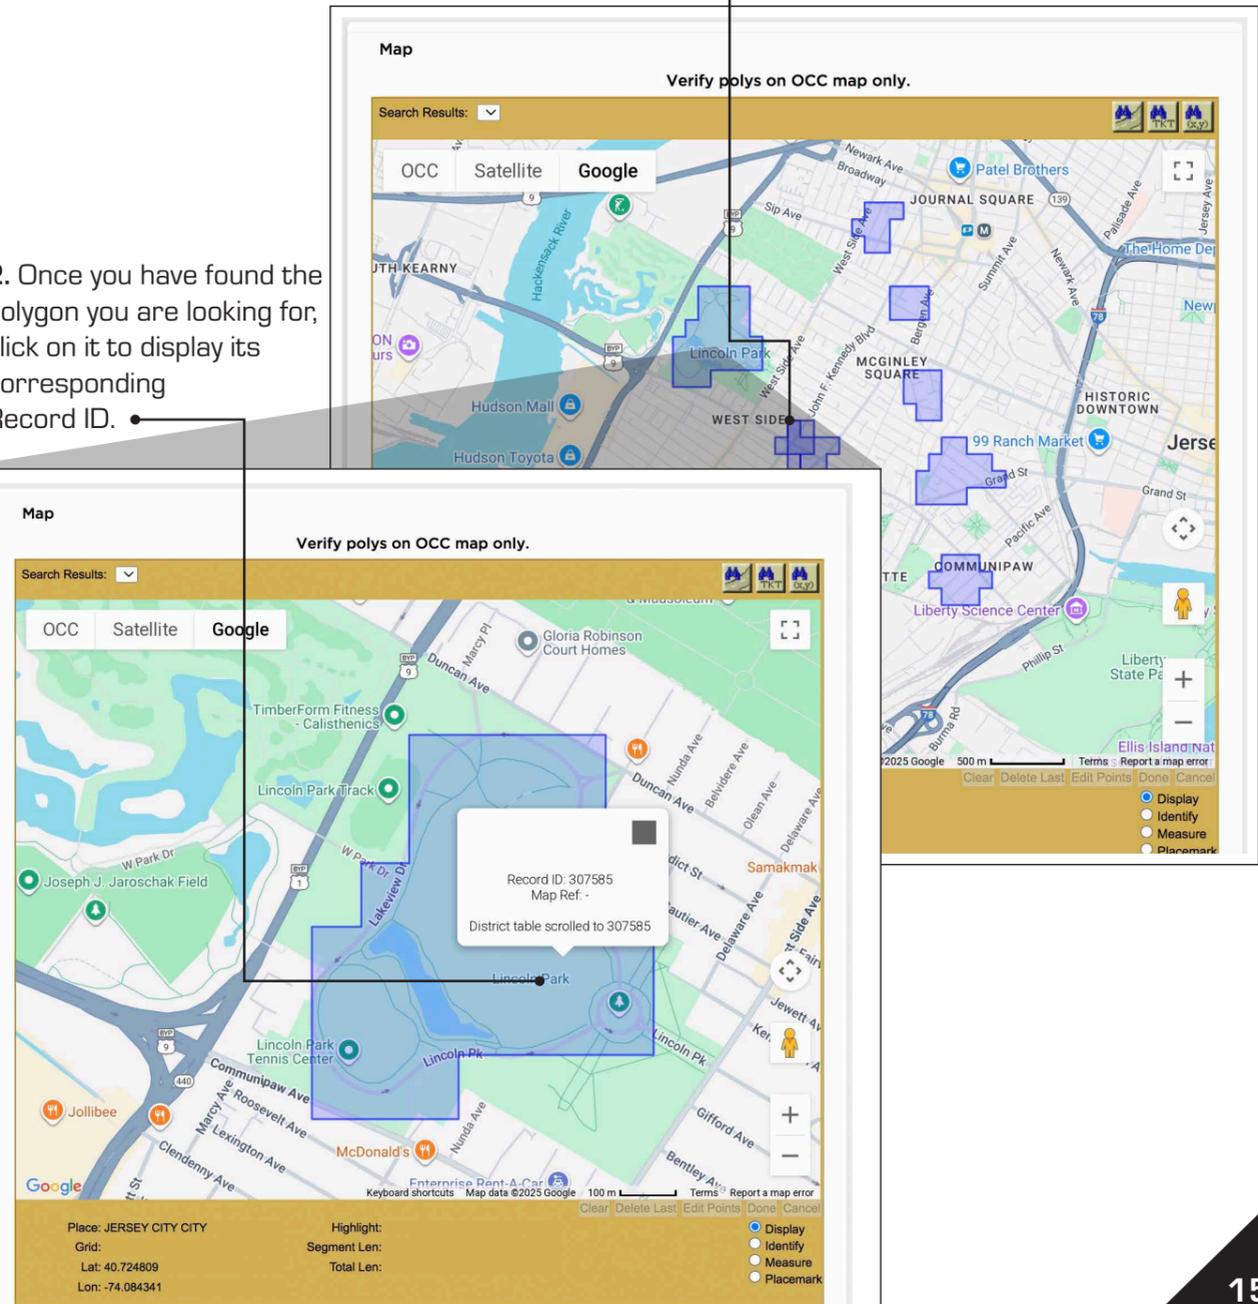

4. At this point, you can choose **MODIFY** to change the boundaries of the district polygon or **DELETE** to remove the polygon from our system.

VIEWING A POLYGON (Continued - Alternate Method)

Don't have your specific Record ID number? That's ok - here's an **Alternate** way to view your District Polygons.

1. When in the **Districts** box, click the **All** button, then the **Goto** button to display all active polygons. Notice the polygons selected now appear in **blue** on the map. Zoom in to get a closer look at the polygons.

2. Once you have found the polygon you are looking for, click on it to display its corresponding Record ID.

ADDING A POLYGON

1. To begin adding a new polygon to the database, first navigate in the map to the selected area.

Work In Progress Box

Work In Progress:

Navigation: << << >> >>

Scroll To:

Map	Type	Record ID	Map Ref	Eval Server	Act Date	User	Comments	Has Rings
<input checked="" type="checkbox"/>	ADD	1000001	-		07/31/2025	scott@occinc.co	New	no
<input type="checkbox"/>	ADD	1000003	-		08/02/2025	briancasey@occ	New	no

2. Click the **NEW** button at the bottom of the **Work In Progress** box.

Map Display - MAP view (Google)

Verify polys on OCC map only.

Map controls: Search Results, OCC, Satellite, Google, Keyboard shortcuts, Map data ©2025 Google, 200 m, Terms, Report a map error, Clear, Delete Last, Edit Points, Done, Cancel, Display, Identify, Measure, Placemark.

Place: GALLOWAY TOWNSHIP
Grid: Lat: 39.463236, Lon: -74.493458
Highlight: Segment Len: 3792.67 ft, Total Len: 1.27 mi

3. Start drawing the polygon by clicking on the map where you would like to begin. Then release the button and move the mouse in the desired direction. **Click and Release** each time you would like to make another line of the polygon.

Refer to the **“Segment Length”** and **“Total Length”** displays in the lower portion of the map to ensure that the proper footage is mapped.

ADDING A POLYGON (Continued)

4. Continue until the entire area needed is covered.

Map Display - MAP view (Google)

Verify polys on OCC map only.

Map controls: Search Results, OCC, Satellite, Google, Keyboard shortcuts, Map data ©2025 Google, 200 m, Terms, Report a map error, Clear, Delete Last, Edit Points, Done, Cancel, Display, Identify.

5. To close the polygon, simply click on the first point you made on the map.

Note: If you make a mistake while drawing your polygon, there are several tools for correcting it, found in the bottom-right corner of the map window. The **“Delete Last”** button will delete the last point you placed on the map. The **“Edit Points”** button allows you to move any point you have already placed by dragging and dropping. The **“Clear”** button will delete the polygon you are working on completely, allowing you to start over. Finally, clicking **“Cancel”** will cancel the transaction entirely.

6. Once you have drawn the polygon, click the button labeled **Done** in the bottom right corner of the map. This will bring up a window labeled **“Transaction from District Polygon Information.”** You may enter a date you would like the change to go into effect by either manually entering it (in MM/DD/YYYY format) or selecting it from the **calendar button**. The new polygon will be installed on that date or as soon thereafter as possible. You may also enter any **comments** that might be applicable to the new polygon, if desired. Click **OK** if you are satisfied with the polygon, or hit **Cancel** to start over. After you have clicked **OK**, the new polygon transaction will appear in the list located in the **Work In Progress** box.

Transaction From District Polygon Information

Activation Date:

Map Ref:

Comments:

IMPORTANT: You can only draw new polygons that are completely contained within the county you are currently viewing. (See Appendix A1 for more details)

DELETING A POLYGON

1. Select the polygon that you wish to delete from the list in the Districts box.

Districts Box

[Goto (1)] [Clr (1)] [All (2)] [History] [New] [Edit] [Submit] [Abort] [Submit All (2)] [Abort All (2)]

The newly modified polygon will be displayed in **red**.

The original polygon will still be displayed in **blue**.

THE POLYGON TRANSACTION PROCESS

Any time you make any changes to your database, you create a transaction. In order for a transaction to become active, it **must** pass several steps of verification, represented by the 4 boxes located between the Location Information display and the Map display. The 4 steps (or “boxes”) are: **DISTRICTS - WORK IN PROGRESS - TO BE VERIFIED - COMMITTED** (The **polygons** appearing in the map display are color coded to indicate in which box they reside.)

[Goto (1)] [Clr (1)] [All] [History]

For example:
This newly created “Modify” Transaction currently resides in the **Work In Progress** box. Clicking **Submit** will

Submit

pass the transaction to the **To Be Verified** box.

Clicking **Approve** will

Approve

submit the transaction to the call center for processing.

(It will also appear in the **Committed** box.)

Once the transactions are listed in the **To Be Verified** box, you will need to carefully verify the changes to ensure they are accurate. After approving the transactions, they will be listed in the **Committed** box, indicating to the call center you’re ready for the changes to go into effect. Remember, the transaction will go into effect according to the activation date, not immediately after you have committed it.

You will receive an email notification when you commit the transaction, and a SECOND email once the transaction has gone into effect.

The following pages explain the transaction boxes and their **functionality**.

THE POLYGON TRANSACTION PROCESS (Continued)

Districts

The Districts box contains a complete list of all currently active polygons matching the county and district code you selected in the Location Information section. In the Districts box you can view, modify, or delete any of your currently active district polygons. When you select a polygon from the Districts list (by clicking the check box located to the far left of the list), it will appear on the map in blue, signifying it as an unmodified district polygon. When you choose to Modify or Delete an active polygon, a transaction is created, and will appear under the Work In Progress box.

NOTE: It is common for District polygons and polygons from other boxes to overlap each other. You may go to the appropriate box (Districts, Work In Progress, To Be Verified, or Committed) and click **CLR** for the polygons you wish to stop being displayed on the map.

THE POLYGON TRANSACTION PROCESS (Continued)

Work In Progress

The Work In Progress box contains a list of transactions: polygons that are in the process of being newly created, modified, or deleted. Any transactions that began in the Districts box will appear here next. In the Work In Progress box you can create new district polygons ("New"), submit existing polygon transactions to the To Be Verified box ("Submit"), or cancel existing polygon transactions entirely ("Abort"). You can also modify any polygon transactions listed here ("Edit").

Polygons that appear in the Work in Progress box will be displayed in **RED** on the map.

THE POLYGON TRANSACTION PROCESS (Continued)

To Be Verified

The To Be Verified box contains a list of polygons that have "passed" the previous Districts and Work In Progress steps, and are waiting for final verification or rejection. Here you can either Approve a transaction, which will submit the polygon for inclusion in the database, or Reject a transaction, which will bounce it back to the **Work In Progress** box.

To Be Verified Box

Map Display - OCC Map

Polygons that appear in the To Be Verified box will be displayed in **PURPLE** on the map.

THE POLYGON TRANSACTION PROCESS (Continued)

Committed

The Committed box contains a list of all polygon transactions that have been fully approved. Once the polygon has passed the final step of verification (the **To Be Verified** section), a record of the transaction will appear in this section so that you can view a list of all polygons that have been added, edited, or deleted. Once the transactions have been installed, the polygons will no longer be listed here, and will be displayed in the Districts box (unless deleted).

Committed Box

Committed: Hide

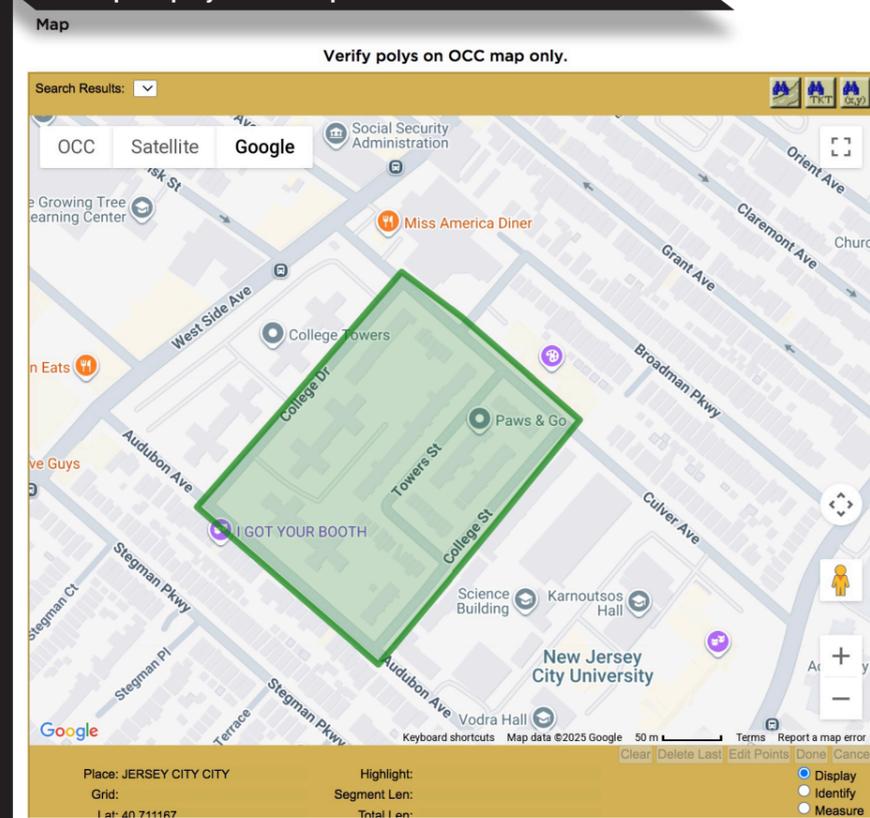

Navigation: |<< << >> >>|

Scroll To:

Map	Type	Record ID	Map Ref	Eval Server	Act Date	User	Comments	Has Rings
✓	MOD	307587	-		08/06/2025	briancasey@occ	Approve	no

Buttons: Goto (1) Clr (1) All History

Map Display - OCC Map

Polygons that appear in the Committed box will be displayed in **GREEN** on the map.

REMINDER: Always check your work before approval. Once the change goes into effect, it can take a few days to correct it. For security and accuracy, limit who can edit your database. It is always better to have one person make the change and another to check and approve the work.

Exiting IMAP

After all changes have been made and submitted, exit IMAP by clicking on the **EXIT** button in the upper right corner of the screen. This will then take you back to the main menu and you can log out.

Activation Date for New or Changed Polygons

Your polygons may or may not be installed on the actual date you requested for activation. Updates are done daily Monday through Friday (excluding holidays). Changes are installed on the requested date or as soon thereafter as possible. If you have not received an email confirmation of your polygon submissions within one week of your selected activation date, please email us at nj@occinc.com.

Questions? Comments? Suggestions? Feel free to contact the **New Jersey One Call** database department at nj@occinc.com.

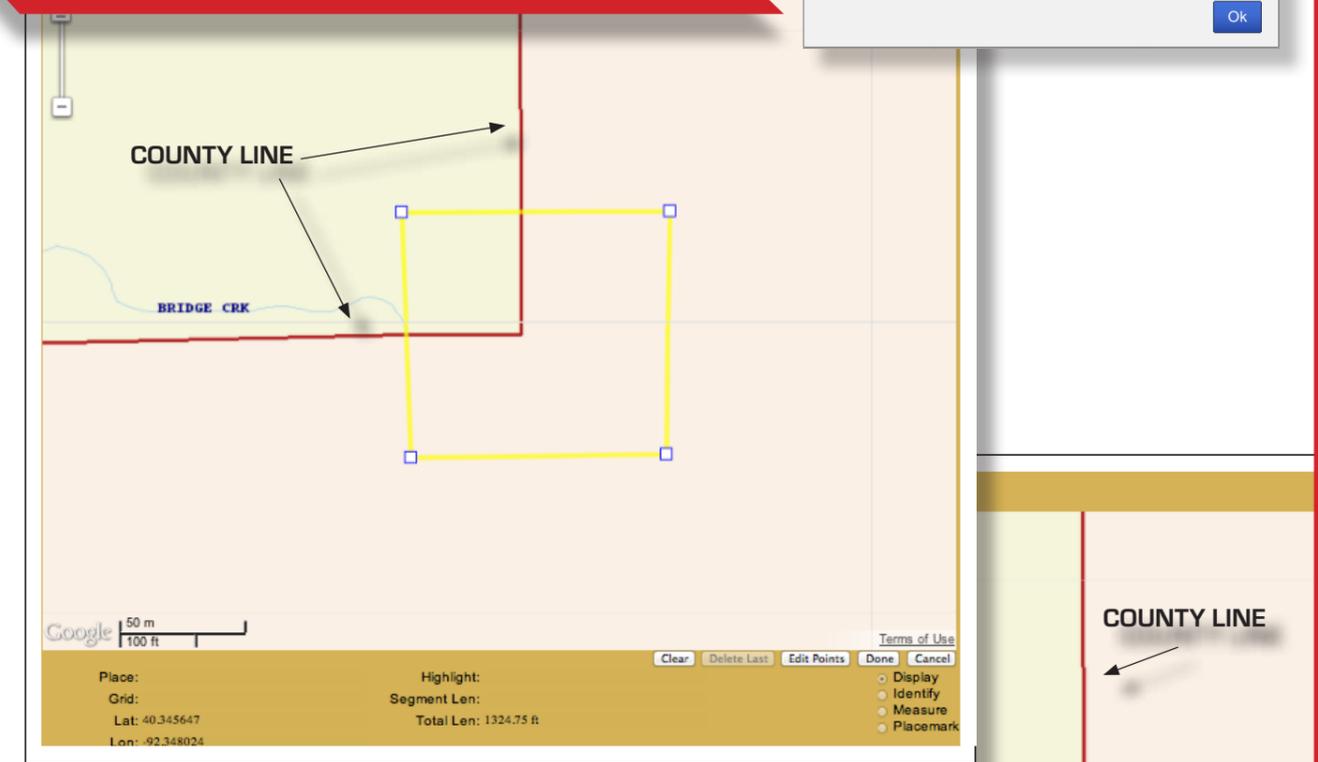

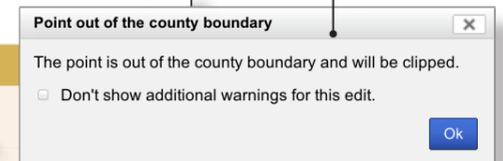

Polygons Drawn Outside County Boundaries

You can only draw new polygons that are completely contained within the county you are currently viewing (county boundaries are visible in the OCC map view). **IMPORTANT: If you attempt to draw a polygon that extends beyond the county boundaries, the computer will “clip” the outlying portions of your polygon, and you will see [this pop-up item](#).**

If you want your notification area to extend into another county, you must create a new polygon in the other county that continues your notification area.

Polygon as drawn by the user – note the sections extending outside the currently selected county.

Polygon after “clipping” – all sections of the polygon originally drawn outside of the county have been removed.
